

**ABSTRACT OF THE DISCLOSURE****5     METHOD AND APPARATUS FOR DYNAMICALLY DETERMINING ACTIONS  
         TO PERFORM FOR AN OBJECT**

         A method, apparatus, and computer implemented  
10    instructions for presenting actions associated with an  
         object displayed in a graphical user interface in a data  
         processing system. Actions are dynamically associated  
         with the object. In response to a selection of the  
         object, the actions are presented in the graphical user  
15    interface.
